

Elevator PITCH

6th March 2023

Paolo De Rosa & Laura Baldi | Founders

Is your walker limiting you?

*Are you bored of the usual walk
around the house?*

Problem

25% of the UE population report limitations in performing daily activities due to health problems.

* EUROSTAT 2021: Functional and activity limitations statistics

10% of the population between 60 and 69 years has walking disorders.

* Gait disorders in adults and the elderly

Scenario

Social inclusion

Independence

Solution

An innovative aid that combines the efficiency of a new-generation electronic wheelchair and the functionality of a walker as a residual mobility aid.

[Slimmed-down and manageable product release].

Prototype version
"electric wheelchair"

Prototype version
"walker"

Solution
